FIAT MULTITUBE AIR FILTER

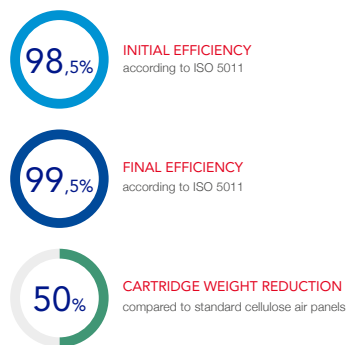

DESCRIPTION

Sofima MULTITUBE, the **revolutionary engine air filtration technology** developed by UFI Filters has the advantage of being **geometrically flexible allowing to optimise the limited space** available in the engine compartment. Due to its **double tubular structure** which replaces the traditional air panel, the revolutionary UFI air filter has a **cartridge that is up to 50% lighter**. The two tubes on the MULTITUBE are placed in an airbox designed and manufactured by UFI, made of polypropylene, a light, deformation-resistant material. The consequence is **lower fuel consumption and less CO₂ emissions**.

Sofima MULTITUBE's revolutionary air flow is also the result of the **improved fluid dynamics in the air flow to the engine**. This minimises resistance as well as pressure and energy loss, with a consequent **increase in supply of power to the engine**.

The special cartridge coupling system also attaches the cartridge firmly to the filter box, **simplifying service operations** and preventing the entry of dirty air into the engine, thereby guaranteeing an additional level of protection.

The **FormulaUFI.Extreme** filter media engineered by UFI Filters, consists of a rigid, non-woven filter media with synthetic hydrophobic fibres, structured according to a specific distribution gradient of diameter and porosity, which keep their full functionality constant throughout the product's entire life cycle.

Max Flow rate

210 kg/h

DHC

>120 g

FILTRATION MEDIA

FORMULA
UFI.EXTREME

Microscope magnification

SPARE PARTS CODE

S 1TUB A

DISTINCTIVE FEATURES

- + Up to 50% cartridge weight reduction
- + Greater availability of power to the engine
- + Filtering media in **FormulaUFI.Extreme**
- + Filtration efficiency of over 99,5%

**MULTI
TUBE**

MAIN APPLICATIONS OF AIR FILTER S 1TUB A

FIAT	500 (312) 1.0 Mild Hybrid	01/20 >
	500C (312) 1.0 Mild Hybrid	01/20 >

SOFIMA FILTER, CHOSEN BY THE BEST.
